

This document contains the codebook with question wordings and response options for the panel survey data in Study 2 in the article "Partisan Elites as Culprits: How Partisan Elite Rhetoric Shapes Partisan Perceptual Gaps" by Martin Bisgaard and Rune Slothuus, published in American Journal of Political Science

The data file “study2.RData” contains the following variables:

[Numbers in square brackets refer to question numbers in full questionnaire; see questionnaire_study2]

RecordNo	Respondent ID number
gender	Respondent’s gender. 1 Female (“Kvinde”) 2 Male (“Mand”)
education	Respondent’s highest education level. 1 Primary school 2 High school 3 Business/vocational high school (hhx, htx) 4 Vocational training 5 Short-term higher education 6 Medium-term higher education 7 Long-term higher education 8 Doctoral degree/PhD 9 Prefer not to say
age	Respondent’s age in years.
region	Geographical region where respondent lives 1 Copenhagen Area (Capital Region) 2 Region Zealand 3 Region Southern Denmark 4 Central Region 5 Region Northern Denmark

mobile_device	Did the respondent answer the survey on a mobile device?
1	Yes
2	No
tot_time	Total number of time taken to complete the survey, measured in seconds
VK	Respondent's partisanship including leaners. Measured using the questions "If a national election were held tomorrow, which party would you vote for?" [q5a] and "You have responded that you do not know party would you vote for if a national election were held tomorrow. If you had to choose a party, which party are you leaning towards the most?" [q5b]
0	Would vote for or leans towards the Social Democratic Party or the Social Liberals (parties in government)
1	Would vote for or leans towards the Liberal Party or the Conservative Party (main parties in opposition)
budgetint	Respondent's interpretation of the budget deficit. "Do you think that a budget deficit of this size is a problem in the current situation?" [q9a and q9b] (Rescaled 0-1 where 1 = "A very big problem" and "Don't know" is coded as missing).
1	A very big problem
.75	A big problem
.5	Somewhat of a problem
.25	Not a big problem
0	No problem at all
NA	Don't know
unempint	Respondent's interpretation of nemployment rate. "Do you think that unemployment of the current size is a problem?" [q10a and q10b] (Rescaled 0-1 where 1 = "A very big problem" and "Don't know" is coded as missing).
1	A very big problem
.75	A big problem
.5	Somewhat of a problem
.25	Not a big problem
0	No problem at all

NA Don't know

Btreat

Budget Experimental treatment condition

problem

“New key figures show that the public budget deficit will reach around 13.5 billion kroner in 2015. The Social Democrats have commented that a deficit of this size is a serious problem.” [q9a]

noproblem

“New key figures show that the public budget deficit will reach around 13.5 billion kroner in 2015. The Social Democrats have commented that a deficit of this size is not a problem.” [q9b]

Utreat

Unemployment Experimental treatment condition

problem

“New key figures show that there is around 132,000 unemployed people in Denmark nowadays. The Social Democrats have commented that unemployment of this scale is a serious problem.” [q10a]

noproblem

“New key figures show that there is around 132,000 unemployed people in Denmark nowadays. The Social Democrats have commented that unemployment of this scale is not a problem.” [q10b]
